PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience building and shipping production web and mobile platforms end-to-end. Proven track record as sole/lead developer delivering React, React Native, Node.js, and TypeScript products — including AI agent services, real-time systems (WebRTC, WebSockets), and cloud-native backends (AWS, Docker, PostgreSQL, Redis) — across HealthTech, Ride-Hailing, and EV Mobility.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, React Native, Redux, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Prisma ORM, REST APIs, WebRTC, WebSockets

Databases: PostgreSQL, Redis, Firebase

Cloud: AWS, Docker

AI: Google Gemini API, LLM Agent Development, Model Context Protocol (MCP)

DevOps: Git, CI/CD

Tools: Mapbox, RBAC, Server-Driven UI (SDUI), OCPI (eMSP), Payment Gateways (Cashfree, Zoho)

PROFESSIONAL EXPERIENCE

Lead Full Stack Engineer | Zaptric Mobility Aug 2024 – Present | Gurgaon, India

- Sole/lead engineer owning architecture and end-to-end delivery of a full-stack EV mobility platform.
- Built the React/TypeScript admin dashboard, two React Native apps (driver, supervisor), and the Node.js/Prisma backend.
- Engineered a WhatsApp-based EV charging flow (Node.js, Express, Prisma, PostgreSQL) letting users scan station QR codes and pay for charging sessions entirely through chat.
- Integrated OCPI (Open Charge Point Interface) as the eMSP (e-Mobility Service Provider) — station discovery, charging sessions, CDR billing, and tariff management for interoperability with third-party charge point operators (CPOs).
- Built a production AI agent using Google Gemini and Model Context Protocol (MCP) to automate supervisor workflows, driver support, escalation handling, and slot allocation.
- Developed a role-based access control (RBAC) fleet-management dashboard (React, TypeScript, Radix UI, Mapbox) covering vehicle lifecycle, maintenance audits, driver documentation, wallets, and payments.
- Implemented a server-driven UI (SDUI) architecture in React Native and integrated real-time GPS navigation, biometric face-detection check-in (ML Kit), and payment gateways (Cashfree, Zoho) into production driver apps.

Driver App: [Website](#) | [Google Play](#)

Software Developer | Ethereum Technologies Jul 2023 – Aug 2024 | Jammu, India

- Built real-time telehealth platforms (All Cures, Saathi) enabling live video consultations using WebRTC, WebSockets, and React.
- Improved application performance by **20%** and Core Web Vitals by **200%** through rendering and network optimizations.
- Implemented containerized deployments with Docker, reducing deployment time and improving release reliability.

All Cures: [App Store](#) | [Website](#)

Computer Science Teacher | Ministry of Education, Government of India Apr 2022 – Jul 2023 | Jammu, India

- Designed UI/UX for a React Native school-attendance app and built a Python coding curriculum for high schoolers.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science — Government College of Engineering and Technology | Aug 2018 – Oct 2022 | GPA: 8.0
